Free software ?

Breaking the frontier between information suppliers and consumers

A paradigm shift :

Cooperation + Competition = Coopetition

Competition on services
Cooperation on knowledge production

Economic insights

“Classical” economics : micro economy insights

Is reducing the dead weight the main economic public interest in competition?

Economics of innovation : key role of communities

How is knowledge produced? What is meritocracy?

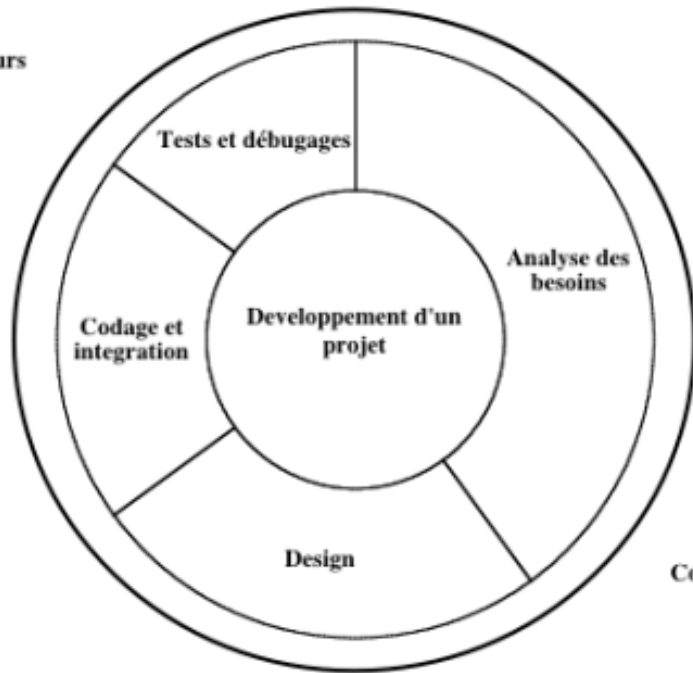

Economics of networks : role of knowledge flows

How is knowledge used (and reused) to create value?

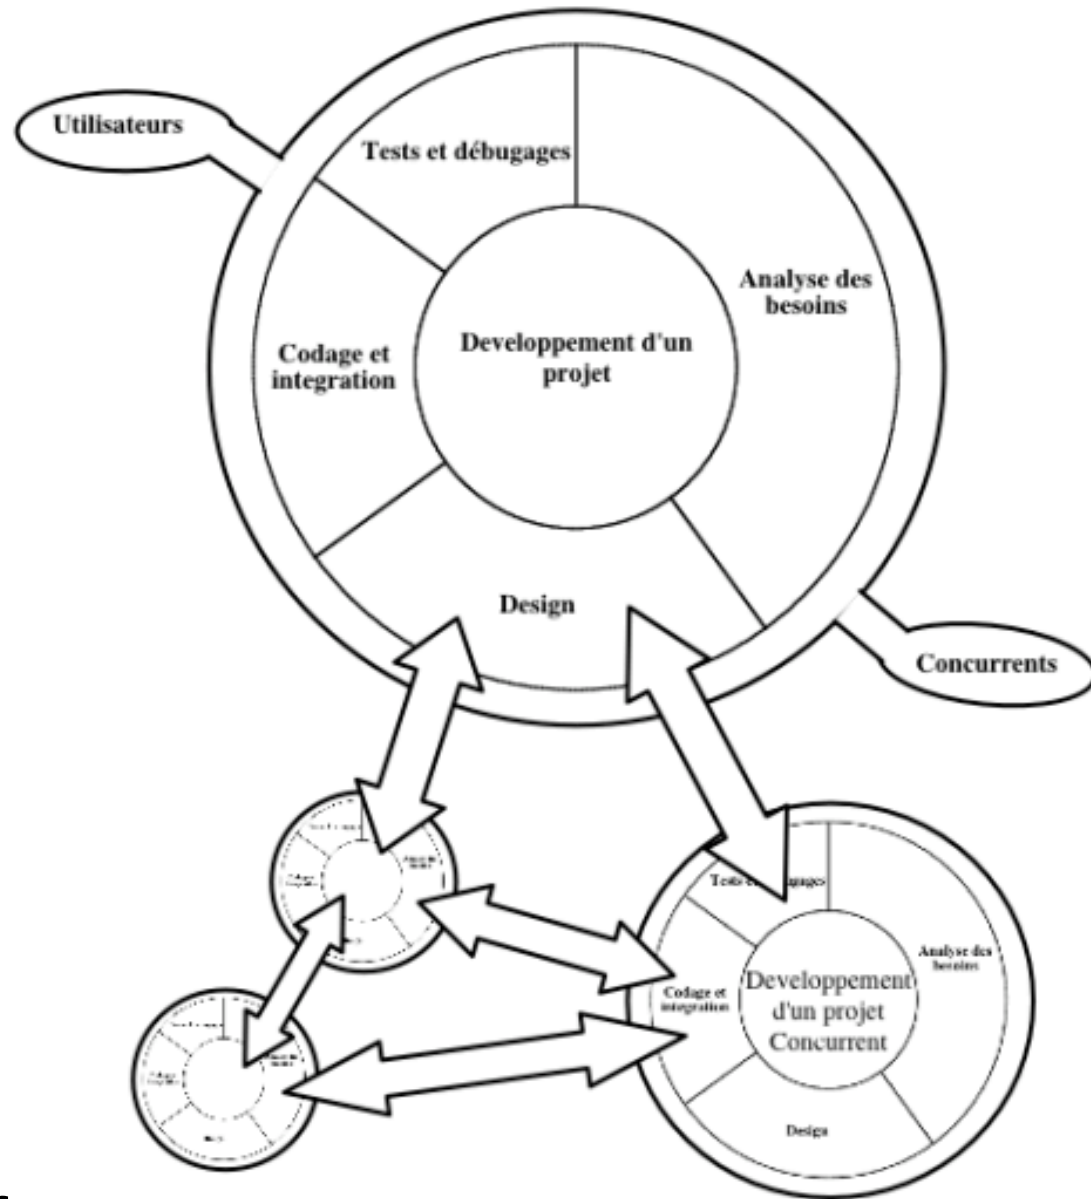

Economics of knowledge : nature of knowledge

Why isn't knowledge an ordinary good?

Utilisateurs

Concurrents

From proprietary to free software
